Account Expert

One skill, one customer, context rebuilt from the tenant rather than from a CRM.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Owns the context for one named customer, rebuilding what is happening with them from mail, meetings and files, and producing a pre-meeting brief or a state-of-the-account summary on request.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *"Brief me before the customer meeting"*
- *"What is happening with this account?"*
- *"Catch me up on them"*

What you get back

- What changed on the account since last time
- Open commitments, both yours and theirs
- Who went quiet, and the questions still open

What it will never do without asking you

- Never contact the customer. Drafts only, and only when asked.
- Never produce a health score, a risk rating or a close probability.
- Never share internal commentary about the account externally, and never include internal pricing discussion in anything drafted to the customer.

THE RULE IT FOLLOWS — A quiet account is a finding.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE
Uploaded skills only work on a laptop or desktop.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* to set the names and thresholds.
