Cloud Cost Digest

Explains what moved on the bill, with the question to ask each owner.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Turns cloud billing exports and provider alert emails into a short digest of what moved, what is anomalous and what to ask an owner about.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *"What moved on the cloud bill?"*
- *"Explain this month's cloud spend"*
- *"Anything odd in the billing export?"*

What you get back

- The total for the period against the one before
- The three biggest movements, with the owner to ask
- Anomalies no explanation could be found for

What it will never do without asking you

- Never state a forecast as a commitment.
- Never recommend terminating, resizing or deleting a resource. Surface the movement and the question; the owner decides.
- The provider's own billing console is the source of truth. This reads an export.

THE RULE IT FOLLOWS — A flat month is a result.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE

Uploaded skills only work on a laptop or desktop.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
