Document Transmittal Tracker

Answers “what did we send, and who still owes us a response”, from the mail itself.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Tracks documents issued to clients, contractors and authorities: what was sent, to whom, on what date, what response was due and what is now overdue for return.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add → Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *“What did we send the client?”*
- *“Who still owes us a response?”*
- *“What transmittals are overdue?”*

What you get back

- What was issued, to whom, and on what date
- What is overdue, grouped by party
- Revisions that quietly superseded an open item

What it will never do without asking you

- Never issue, reissue or transmit a document.
- Never chase a party directly. Drafts go to the user.
- Never mark anything as approved. Approval is a recorded act in the project’s own system.

THE RULE IT FOLLOWS — Nothing overdue is the goal, not a failure of the skill.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE

Uploaded skills only work on a laptop or desktop.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
