Expense Reconciliation

Finds the gap between what was claimed and what was evidenced, before someone else does.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Reconciles submitted expense claims against the receipts and statements sitting in the mailbox, lists what is missing or unmatched, and drafts the chaser to each claimant.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *"Check my claims against the receipts"*
- *"What receipts am I missing?"*
- *"Reconcile last month's expenses"*

What you get back

- Every claim matched to its receipt, or flagged
- Counts by status, and the total value unmatched
- A drafted chaser for each person to chase

What it will never do without asking you

- Draft, never send. Chasers are drafts.
- Never approve, reject or adjust a claim. Never state a reimbursable amount as final.
- The expense system and the finance ledger are the source of truth. This reads mail.

THE RULE IT FOLLOWS

A clean reconciliation is the best outcome.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE
Uploaded skills only work on a laptop or desktop.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* to set the names and thresholds.
