Internal Expert Finder

Answers “who here has already solved this”, with the evidence, before anyone reinvents it.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Finds who inside the organisation has already done a given kind of work, with the evidence for each name, and drafts the introduction.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *“Who here has done this before?”*
- *“Find someone who knows this system”*
- *“Who should I ask about this?”*

What you get back

- A shortlist of people, with the evidence for each
- Who to ask first, and who to ask if they are away
- Where it looked, so you can see what it missed

What it will never do without asking you

- Never external. No sourcing, no candidates, no professional networks, no recruitment use.
- Never infer expertise from a job title, a team name or a reporting line.
- Never surface a document the user cannot already access. Enterprise Search respects permissions and this skill must not try to work around that.

THE RULE IT FOLLOWS

Finding nobody is a real and useful answer.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE

Uploaded skills only work on a laptop or desktop.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
