Onboarding Buddy

Turns “they start Monday” into a dated plan built from what the team actually has.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Builds a dated first-fortnight plan for a new joiner from the team’s own documents, meetings and systems, naming who they meet and what they read on which day.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *“Plan the first two weeks for our joiner”*
- *“Who should they meet in week one?”*
- *“What should they read before Monday?”*

What you get back

- A day-by-day plan for the first fortnight
- Who they meet, and why that person
- What exists for them to read, and what is missing

What it will never do without asking you

- Never create calendar events or send invitations. Propose holds for approval.
- Never include anything about the joiner’s compensation, background or personal details.
- Never surface documents the joiner will not have permission to open once they start: note them as access needed instead.

THE RULE IT FOLLOWS — A short plan with real links beats a full one with placeholders.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE

Uploaded skills only work on a laptop or desktop.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
