MICROSOFT 365 COPILOT COWORK · **TEAM LEAD** · FREE, MIT LICENCE

Project Decomposer

Turns a project into tasks somebody can actually finish, each with a stated way to tell it is done.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

Breaks a project, initiative or goal into owned tasks, each carrying its own verification criteria and a named owner, and returns one Adaptive Card per task.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *"Break this project into tasks"*
- *"Who owns what on this?"*
- *"Turn this goal into a plan"*

What you get back

- A card per task, each with a named owner
- How you will know each task is actually finished
- The whole set saved to a file, so it survives the chat

What it will never do without asking you

- Plans only. Never create tasks in Planner or To Do, never send anything, never book time.
- Never assign a named person who has not already been associated with this work in the evidence.
- Never state a date as agreed unless the evidence shows it was agreed.

THE RULE IT FOLLOWS — Returning fewer tasks is usually better.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE
Uploaded skills only work on a laptop or desktop.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* to set the names and thresholds.
