Team Lead Mode

Runs the pack in order and assembles one review, rather than making you run four things.

What is Cowork?

The part of Microsoft 365 Copilot that **does the work**, not just the chatting. It reads your mail, files and meetings, then prepares the result. By default it asks you before it sends anything.

What a skill is

One file you upload once. It teaches Cowork a job you keep repeating, so you stop explaining it every time. It lives in your own OneDrive.

What this one gives you

The orchestrator for a team lead's week.

1. Download the file for this skill
2. In Cowork, open **Customize**
3. Go to the **Skills** tab
4. **Add** → **Upload skill**, pick the file
5. Start a **new** chat and say the words below

Then just say one of these

- *"Set me up for the week"*
- *"Run my team lead review"*
- *"Prepare everything for Monday"*

What you get back

- One document: the three things that need you this week
- A section per report and per workstream, plus your calendar
- A run report saying which parts worked and which failed

What it will never do without asking you

- Inherits every boundary of the skills it calls, and may not relax any of them.
- Never send, post, create or schedule anything. It assembles.
- Never fill a degraded section with its own analysis. Degraded means thinner, not invented.

THE RULE IT FOLLOWS — A quiet week produces a short review.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default.

NOT ON MOBILE

Uploaded skills only work on a laptop or desktop.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* to set the names and thresholds.
