Change Advisory Board Prep

Builds the pack from what people actually wrote, and names every change that arrived without a.

Do this, about two minutes

1. **Download the skill file**
   change-advisory-prep.zip
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   “Prepare the pack for the next CAB”

   “What changes are up for review?”

   “Which changes have no rollback plan?”

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- The board pack: change, owner, window, risk, rollback
- Which changes arrived with fields missing
- Prior incidents on the same systems

What it will never do without asking you

- Never approve, reject or schedule a change. The board decides.
- Never write a rollback plan. Report its absence.
- Never state a risk rating of your own. Report the proposer’s and say it is theirs.

THE RULE IT FOLLOWS

A board with nothing to review is fine.

Runs when you ask for it. Want it on a timer? Say *“do this every Monday at 9”* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
