Document Transmittal Tracker

Answers “what did we send, and who still owes us a response”, from the mail itself.

Do this, about two minutes

1. **Download the skill file document-transmittal-tracker.zip** ↓
   github.com/kesslernity/awesome-copilot-cowork-bots
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   “What did we send the client?”

   “Who still owes us a response?”

   “What transmittals are overdue?”

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- What was issued, to whom, and on what date
- What is overdue, grouped by party
- Revisions that quietly superseded an open item

What it will never do without asking you

- Never issue, reissue or transmit a document.
- Never chase a party directly. Drafts go to the user.
- Never mark anything as approved. Approval is a recorded act in the project’s own system.

THE RULE IT FOLLOWS

Nothing overdue is the goal, not a failure of the skill.

Runs when you ask for it. Want it on a timer? Say *“do this every Monday at 9”* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
