Leadership Update Drafter

Writes the upward update in a fixed shape, with the uncomfortable parts kept in.

Do this, about two minutes

1. **Download the skill file**
   leadership-update-drafter.zip
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   "Draft my update for leadership"

   "Write up my monthly report"

   "Prepare my steering committee update"

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- Where we are, what changed, what is at risk, what I need from you
- A short list of what is still not known
- Facts and opinions kept visibly apart

What it will never do without asking you

- Never send. Draft to the user, always.
- Never soften or omit anything crossing the escalation bar.
- Never attribute a slip or a problem to a named individual.

THE RULE IT FOLLOWS

"Nothing changed this week" is a legitimate update.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?
It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* inside the file to set the names and thresholds.
