Onboarding Buddy

Turns “they start Monday” into a dated plan built from what the team actually has.

Do this, about two minutes

1. **Download the skill file onboarding-buddy.zip**
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

> *“Plan the first two weeks for our joiner”*

> *“Who should they meet in week one?”*

> *“What should they read before Monday?”*

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- A day-by-day plan for the first fortnight
- Who they meet, and why that person
- What exists for them to read, and what is missing

What it will never do without asking you

- Never create calendar events or send invitations. Propose holds for approval.
- Never include anything about the joiner’s compensation, background or personal details.
- Never surface documents the joiner will not have permission to open once they start: note them as access needed instead.

THE RULE IT FOLLOWS

A short plan with real links beats a full one with placeholders.

Runs when you ask for it. Want it on a timer? Say *“do this every Monday at 9”* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
