Subscription Hunter

Surfaces every recurring charge in the mailbox before it renews itself, with a drafted reply ready.

Do this, about two minutes

1. **Download the skill file subscription-hunter.zip**
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   "What are we subscribed to?"

   "What renews in the next 30 days?"

   "Find the subscriptions we forgot"

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- An Excel sheet of every renewal, each row linked to its source
- What renews in the next 30 days, and what looks like waste
- A drafted cancellation or renegotiation, unsent

What it will never do without asking you

- Draft, never send. Cancellation and renegotiation replies are saved as drafts for the user to read, edit and send.
- Never cancel, downgrade or modify anything in a vendor portal, and never follow a cancellation link.
- Never state an amount as the authoritative figure. Finance systems and the contract are the source of truth; this reads what arrived in the mailbox.

THE RULE IT FOLLOWS

Finding nothing is a success.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
