Team Lead Mode

Runs the pack in order and assembles one review, rather than making you run four things.

Do this, about two minutes

1. **Download the skill file team-lead-mode.zip**
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   - *"Set me up for the week"*
   - *"Run my team lead review"*
   - *"Prepare everything for Monday"*

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- One document: the three things that need you this week
- A section per report and per workstream, plus your calendar
- A run report saying which parts worked and which failed

What it will never do without asking you

- Inherits every boundary of the skills it calls, and may not relax any of them.
- Never send, post, create or schedule anything. It assembles.
- Never fill a degraded section with its own analysis. Degraded means thinner, not invented.

THE RULE IT FOLLOWS

A quiet week produces a short review.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?
It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* inside the file to set the names and thresholds.
