Incident Digest

Rebuilds what happened and when, from the traffic, so the review starts from a timeline instead of.

Do this, about two minutes

1. **Download the skill file incident-digest.zip**
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   "Build the timeline for this incident"

   "What happened, and when?"

   "Prepare the incident review"

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- A dated timeline of what happened
- What was observed, what was believed, what is known
- Open questions, each with an owner

What it will never do without asking you

- Never post to a channel, never reply to a thread, never update a status page.
- Never assign an action. List open questions with suggested owners for a human to assign.
- Never state a root cause. Surface what the traffic says and label it belief or finding.

THE RULE IT FOLLOWS

No blame, ever.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?
It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* inside the file to set the names and thresholds.
