Internal Expert Finder

Answers “who here has already solved this”, with the evidence, before anyone reinvents it.

Do this, about two minutes

1. **Download the skill file**
   internal-expert-finder.zip
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   - *“Who here has done this before?”*
   - *“Find someone who knows this system”*
   - *“Who should I ask about this?”*

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- A shortlist of people, with the evidence for each
- Who to ask first, and who to ask if they are away
- Where it looked, so you can see what it missed

What it will never do without asking you

- Never external. No sourcing, no candidates, no professional networks, no recruitment use.
- Never infer expertise from a job title, a team name or a reporting line.
- Never surface a document the user cannot already access. Enterprise Search respects permissions and this skill must not try to work around that.

THE RULE IT FOLLOWS

Finding nobody is a real and useful answer.

Runs when you ask for it. Want it on a timer? Say *“do this every Monday at 9”* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
