MICROSOFT 365 COPILOT COWORK · **TEAM LEAD** · FREE, MIT LICENCE

Project Decomposer

Turns a project into tasks somebody can actually finish, each with a stated way to tell it is done.

Do this, about two minutes

1. **Download the skill file**
   project-decomposer.zip
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   "Break this project into tasks"

   "Who owns what on this?"

   "Turn this goal into a plan"

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- A card per task, each with a named owner
- How you will know each task is actually finished
- The whole set saved to a file, so it survives the chat

What it will never do without asking you

- Plans only. Never create tasks in Planner or To Do, never send anything, never book time.
- Never assign a named person who has not already been associated with this work in the evidence.
- Never state a date as agreed unless the evidence shows it was agreed.

THE RULE IT FOLLOWS

Returning fewer tasks is usually better.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?
It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* inside the file to set the names and thresholds.
