Account Expert

One skill, one customer, context rebuilt from the tenant rather than from a CRM.

Do this, about two minutes

1. **Download the skill file account-expert.zip**
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   “Brief me before the customer meeting”

   “What is happening with this account?”

   “Catch me up on them”

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- What changed on the account since last time
- Open commitments, both yours and theirs
- Who went quiet, and the questions still open

What it will never do without asking you

- Never contact the customer. Drafts only, and only when asked.
- Never produce a health score, a risk rating or a close probability.
- Never share internal commentary about the account externally, and never include internal pricing discussion in anything drafted to the customer.

THE RULE IT FOLLOWS

A quiet account is a finding.

Runs when you ask for it. Want it on a timer? Say *“do this every Monday at 9”* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?
It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* inside the file to set the names and thresholds.
