Calendar Defender

Finds the week's conflicts and the meetings that should not exist, and proposes, never acts.

Do this, about two minutes

1. **Download the skill file calendar-defender.zip**
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   "Check my week for conflicts"

   "Which meetings can I drop?"

   "Do I have any focus time left?"

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- Your clashes, named meeting by meeting
- Meetings with no stated purpose and no decision to make
- Focus time against your target, and the exact changes to make

What it will never do without asking you

- Never accept, decline, move, shorten, cancel or create anything. Every output is a proposal for the user.
- Never touch anything on the config never-touch list.
- Never characterise a colleague's meeting as a waste of time. Report the absence of an agenda as a fact and let the user decide.

THE RULE IT FOLLOWS

A clean week needs one line.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
