Competition Monitor

Reports a material change and nothing else. The suppression is the product.

Do this, about two minutes

1. **Download the skill file**
   competition-monitor.zip
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   “Anything new from our competitors?”

   “Check the competitor list”

   “Did anyone launch something?”

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- A before-and-after table of what actually changed
- One line on why each change matters
- When nothing changed, one line saying so, and nothing else

What it will never do without asking you

- Never access anything behind a login, a paywall or a trial. Public pages only.
- Never report a competitor’s non-public information even if a source offers it.
- Never characterise a competitor’s intent or finances. Report the observed attribute.

THE RULE IT FOLLOWS

Silence is the success state and the most common one.

Runs when you ask for it. Want it on a timer? Say *“do this every Monday at 9”* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?
It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED
Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED
Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS
Open *references/config.md* inside the file to set the names and thresholds.
