Interview Loop Coordinator

Makes a panel cover the whole bar once, instead of four people asking the same question.

Do this, about two minutes

1. **Download the skill file**
   interview-loop-coordinator.zip
   github.com/kesslernity/awesome-copilot-cowork-bots ↓
2. In Cowork, open **Customize** in the side panel
3. Go to the **Skills** tab
4. Select the arrow next to **Add**, then **Upload skill**, and choose the file
5. Start a **new** chat and say one of these

   "Set up the panel for this role"

   "Who covers what in the loop?"

   "Pull the interview feedback together"

Nothing is sent, posted or deleted unless you press a button. **Changed your mind?** Remove the skill from the same **Skills** tab.

And you get back

- Who covers which competency, and what nobody covers
- What each interviewer needs beforehand
- Afterwards, the evidence, with disagreements shown

What it will never do without asking you

- Never recommend hire or no-hire, never rank candidates, never produce an overall score.
- Never create or send calendar invitations. Propose.
- Never include anything about a candidate not supplied for this process, and never search for a candidate externally.

THE RULE IT FOLLOWS

The pack never produces a hire recommendation.

Runs when you ask for it. Want it on a timer? Say *"do this every Monday at 9"* and Cowork schedules it. You get 25 schedules, so spend them on the jobs you would otherwise forget.

NEW TO COWORK?

It is the part of Copilot that *does the work*, not just the chatting. A skill is one file that teaches it a job you repeat.

YOU NEED

Microsoft 365 Copilot with Cowork switched on by your admin. It is off by default, and not on mobile.

IT IS METERED

Cowork bills on usage. Your admin can cap what you spend.

MAKE IT YOURS

Open *references/config.md* inside the file to set the names and thresholds.
